Education

Vivekananda Institute of Professional Studies - Technical Campus

Bachelor of Computer Applications (Overall CPA: 9.20)

Expected June 2027

Delhi, New Delhi

Passed Central Board of Secondary Education 12th

With PCM Stream

2023-2024

Delhi, New Delhi

Passed Central Board of Secondary Education 10th

2021-2022

Delhi, New Delhi

Experience

Future Interns

Apr 2026 – Present

Data Science & Analytics Intern

Delhi, New Delhi

- Conducted end-to-end business sales performance analysis to identify revenue trends, top-selling products, and regional KPIs, delivering a client-ready dashboard with actionable recommendations.
- Performed customer retention and churn analysis for a subscription-based business using cohort analysis techniques, uncovering key churn drivers and proposing data-driven strategies to reduce customer loss.
- Analyzed marketing funnel data to identify conversion drop-offs and channel performance gaps, producing a funnel performance report with optimization recommendations to improve lead-to-customer conversion rates.

Projects

Customer Retention Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

[GitHub](#)

- Analyzed subscription-based customer data to identify churn patterns and key retention drivers using cohort analysis and EDA techniques.
- Cleaned and preprocessed raw customer data using Pandas and NumPy, handling missing values and feature engineering for accurate analysis.
- Visualized retention trends, churn rates, and customer lifetime metrics using Matplotlib and Seaborn, delivering a structured insight report.

Resume Based Job Recommender | Python, Scikit-learn, Streamlit, Pandas

[GitHub](#)

- Built an NLP-powered recommendation system using TF-IDF vectorization and cosine similarity to match resumes with relevant job descriptions.
- Deployed an interactive Streamlit web app enabling real-time resume upload and ranked job recommendations with skill gap visualizations.
- Preprocessed and structured resume and job description text data using Pandas, improving matching accuracy and recommendation relevance.

Dumble Curl Counter | Python, MediaPipe, OpenCV, Streamlit

[GitHub](#)

- Built a real-time bicep curl counter using MediaPipe pose estimation to track body landmarks via webcam.
- Applied joint angle calculation with OpenCV to accurately count reps and monitor exercise form in real time.
- Deployed with Streamlit providing live visual feedback on rep count and posture as an AI-powered fitness assistant.

Technical Skills

Languages: Python, Java, C, JavaScript

Frameworks & Libraries: React.js, Flask, Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, OpenCV, MediaPipe, Streamlit, Matplotlib, Seaborn, HTML/CSS

Developer Tools: Git/GitHub, Figma, VS Code, Power BI

Technologies: Data Analytics, Machine Learning, Artificial Intelligence, Data Science, Data Preprocessing, OOPs, SQL, MongoDB

Achievements

- Finalist at **AVENSIS Hackathon**, competing among top teams and demonstrating problem-solving and technical skills under time constraints.
- Solved **350+ LeetCode problems** in Java and Python, strengthening proficiency in data structures, algorithms, and competitive problem-solving.
- Completed **Getting Started with Artificial Intelligence** certification by **IBM**, gaining foundational knowledge in AI concepts and applications.
